Emergency Contact (Someone who is authorized to make decisions about your pet during your absence.)

Name: _____ Phone#: _____

Health Requirements:

To maintain a healthy boarding environment, all pets must be current on vaccinations and free of parasites (e.g., fleas, ticks, worms). Boarders without proof of or needing vaccines, or pets found to have parasites will be treated at the owner's expense. Dogs and cats are required to have a negative fecal check within the last 12 months. Required vaccinations are as follows:

- Dogs – Rabies, DHPP, Leptospirosis, Upper Respiratory Vaccine* (URV) and Canine Influenza** (CIV).
*The URV must have been administered within the past 6 mos. or it will need to be given during the pet's stay.
**The initial CIV Vx series must be completed at least 1 week prior to pet's check-in or the pet will be unable to board.
- Cats – Rabies, FVRCP, FeLV, and virulent strain Calici Vaccine.

Please be aware that puppies and kittens that have not completed their initial vaccine series are not fully protected against the common diseases for which they have been inoculated. All cats and dogs will be administered **Capstar** (\$7.23) to eliminate fleas on arrival.
